

Letter of Invitation

Welcome to Lillehammer!

On behalf of the Scandinavian Society of Clinical Physiology and Nuclear Medicine and the Norwegian Society of Nuclear Medicine, I am honoured to invite you to Lillehammer for the 14th Congress, SSCPNM-2008. We shall do our very best to provide optimal conditions for an inspiring scientific event, and we believe Lillehammer offers an opportunity for friends and colleagues to interact as well as great skiing facilities before or after the congress.

Thematically, the congress is divided in 3 parts: i) advanced cardiopulmonary function studies, ii) dementia and multimodality, and iii) molecular diagnostics and neuroendocrine tumors. The outstanding speakers will certainly contribute to interesting and high level presentations. However, the scientific discussion and environment for an interesting meeting is very dependent on the contributions from you and your colleagues.

We look forward to receiving your contributions and to welcoming you to Lillehammer in February 2008.

Frode Willoch  
SSCPNM Congress President 2008
